Noida, India | Open to relocation – Hyderabad / Bengaluru | B.Tech CSE, Graduating 2027

PROFESSIONAL SUMMARY

B.Tech Computer Science undergraduate (Class of 2027) with a strong foundation in data structures, algorithms, and object-oriented programming, and hands-on experience building, testing, and deploying full-stack software using Python, Java, and JavaScript. Proven self-starter who quickly picks up new technologies, communicates technical challenges clearly, and thrives navigating ambiguous, fast-paced problems — demonstrated through internships in backend development and independently built end-to-end platforms. Seeking a Software Engineer Internship (FutureForce) to contribute to Salesforce's Customer 360 Platform and enterprise-scale distributed systems.

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript, HTML, CSS
- Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Complexity Analysis, Machine Learning Fundamentals
- Databases & Querying: MySQL, SQL — relational schema design, CRUD operations
- Web Development: Responsive UI design, HTML, CSS, JavaScript
- Tools & Practices: Git & GitHub, VS Code, automated testing exposure, Data Cleaning & Preprocessing, Excel

PROJECTS

Agentic AI Training & Student Management Platform

Personal Project

https://github.com/im-rohit87/Student_Report/tree/main/agentic_grade_system | Python, Streamlit, Pandas, OpenPyXL, Python-Docx, PPTX, NumPy

- Designed and developed a full-stack, object-oriented platform automating academic and administrative workflows end-to-end, from data ingestion to reporting
- Built a centralized, modular dashboard integrating student portals, automated grade calculation, certificate generation, an AI chatbot, resume generation, and performance analytics
- Engineered Excel-based data-processing pipelines and DOCX/PDF/PPT document automation, applying problem-solving and abstraction to streamline the student lifecycle

Food Ordering Website

Personal Project

https://github.com/im-rohit87/Food-ordering-page/tree/main/Food_Ordering_Web | HTML, CSS, JavaScript, Leaflet.js

- Developed a responsive, component-based UI with cart functionality, dynamic pricing logic, and real-time order tracking
- Integrated Google Maps/Leaflet.js APIs to render live restaurant locations and delivery tracking, solving real-time data-sync challenges

EXPERIENCE

Software Development Intern (PHP)

Jul 2023 – Aug 2023

Meander Software Pvt. Ltd., Mohali

- Developed dynamic web applications using PHP and MySQL, implementing CRUD operations and backend business logic as part of a collaborative development team
- Debugged and optimized existing code, contributing performance improvements that enhanced overall user experience

Web & Mobile Development Intern

Sep 2025 – Nov 2025

IBM Developer Skills Network

- Completed a structured 6-week program covering web and mobile development fundamentals, software design, and testing practices
- Applied hands-on development concepts to real-world project scenarios, quickly learning new frameworks and tools under guided milestones

EDUCATION

B.Tech, Computer Science Engineering (Pursuing)

2024 – 2027

Lloyd Institute of Management and Technology

Diploma, Computer Science Engineering

Govt. Polytechnic College, Mohali — 70%

Higher Secondary, UPMSP — 72%

CERTIFICATIONS

- Wells Fargo — Job Simulation (Forage)
- Walmart USA — Advanced Software Engineering Job Simulation (Forage)
